

Bachelor of Science in Information Technology

B.Sc. (Information Technology)

Curriculum Pattern

Bachelor's degree in 4-year program and 4-year transfer program

Program Description

Bachelor of Science in Information Technology at the Faculty of Science and Technology, Rajamangala University of Technology Srivijaya offers courses in response to the country's continuously growing development of information technology. With modern tools and technologies, graduates will be able to apply knowledge gained for effective and efficient operation which can empower the country's development and competition in information technology. It also produces professionals who are well versed in both theoretical and practical information technology. These human resources can solve the shortage of professionals in information technology and can improve the economy and society of the country.
